

Make a Clothespin Alligator

What do you need?

Wooden clothespin

White glue

Googly eyes

Brush

Poster paints

Pipe cleaner

Scissors

1

For the body: Paint the clothespin green (or whichever color you want your alligator to be).

Set it aside to dry.

2

For the legs: Cut the pipe cleaner into 3 pieces. Fold one piece in the middle and then bend each end to form a "U" shape. Repeat with the other piece (you only need 2 of them).

Pinch the clothespin open and put the front legs all the way back in the alligator's mouth. Glue the back legs against the spring.

3

For the face: Glue googly eyes onto the alligator's head. Let dry.

Your alligator is now ready to get a grip!
